DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 3/19/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The non-patent literature document "German Office Action dated December 22, 2003" has not been received.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art, Plocher et al (DE 19653302 A1, English translation used), discloses a built in ashtray having the general structure as claimed and including a lever mechanism for locking the ashtray and lighter when it is pushed out of the housing so that the cigarette lighter can be inserted into its holder without displacing the holder (p 2, 1st par). Other prior art, Williams et al (4494806), requires a releasable locking bar to maintain the drawer in an open position.

The instant invention has no locking mechanism, but instead uses a spring having a spring force acting on the ashtray, when it is moved out of the housing into the open position, that is greater than the opposing force due to inserting the lighter in its holder. The spring mechanism is a different operational mechanism from that of Plocher et al or Williams et al and would not have been obvious over the prior art locking mechanisms.
